RETAINED INTEREST

We are selling a 1/2 interest and full possession in every bull in the sale. This gives us the right to collect semen at our expense and at the convenience of the new owner. The new owner receives the full salvage value of the bull. If anyone has any questions in regard to this please feel free to contact us.

Videos will be available on both sites as well as at ludvigsonstockfarms.com

$PROFIT - $RANCH - $FEEDER
All three indexes are expressed in terms of % breed rank with the lower number being better. Those bulls with a "0" are at the very top of the breed.

EARLY INSPECTIONS: All 167 highly culled and selected Red Angus and Red Hybred Bulls and Heifers are available for viewing at any time. The bulls and heifers will be put into place at the sale site on Friday prior to the sale. For anyone wanting to see the bulls prior to Friday please contact us.

EARLY ARRIVALS: We welcome everyone to arrive the day before the sale to study the bulls and females selling as well as our program. Also it will give us time to discuss your program goals and objectives.

LODGING/ACCOMODATIONS: There are several lodging options in the area and following is a list of our suggestions:

Sale Headquarters
Holiday Inn – Joplin, Missouri (417)782-1000
Ask for Ludvigson Rate

Other Hotels
La Quinta Inn – Joplin, Missouri (417)781-0500

Hilton Garden Inn – Joplin, Missouri (417)206-6700

AIRLINES: Joplin is served by American Airlines. Nearby Springfield is served by Delta Airlines, United Airlines and American Airlines.

HOSPITALITY/FOOD: Sale hospitality will be provided the day of the sale including coffee and rolls in the morning and lunch served at noon.

SALE LOCATION: The sale is located at White's Livestock Center in Diamond, Missouri conveniently located right on Missouri Highway 59 just north of Diamond, Missouri. 417-325-4141

TRUCKING: We provide for all trucking of animals after the sale, unless the buyer wishes to pick animals up after the sale. All bulls selling in this event for $3,000 or more will be delivered for free to the nearest central points. All other bulls and females will be delivered at cost to the nearest central points.

SALE ORDER: Cattle sell in catalog order for your convenience.

SIGHT UNSEEN PURCHASES (SUS): We encourage everyone to attend the sale but we understand that not everyone can be with us sale day. We offer a 100% Satisfaction Guaranteed Sight Unseen Purchase program through our seasoned and professional marketing representatives. Please feel free to contact any of our representatives on the inside front cover for your buying needs.

FERTILITY: All of the bulls and females selling are guaranteed breeders. We encourage that all bulls be fertility tested prior to turn out.

Veterinarian:
Dr. Darryl Clark, Seneca Vet Clinic, Seneca, Missouri

GENETIC TESTING: All necessary genetic testing has been carried out as prescribed by the Red Angus Association of America. No tested carriers are selling in this event.

Ludvigson Stock Farms

Welcome to Ludvigson Stock Farms Second Spring Edition Ozark Bull and Female Sale. The bulls this year have been fed and developed at Neo Sho Farms in Southwest City, Missouri. We along with Neo Sho Farms and a high end performance group are offering some of the highest quality Red Angus and Hyrbreds anywhere in the country.

The Red Angus breed is extremely "hot" right now and we as stakeholders, both seed stock and commercial, are experiencing a great demand for our product. Red Angus cattle have always been known as "blue collar" workers without a lot of "flash." The cattle have been known for good dispositions, calving ease, adaptability and keeping operations in the black. These convenience traits are more in demand today than at any time in history and will continue to make this breed grow at an exponential pace.

The group of bulls that we are offering in this event, excel for calving ease, growth, maternal and carcass. The leading sires and sire groups in the Red Angus breed are very well represented in this offering. We along with our cooperators have always placed a high level of emphasis on structure and soundness. We realize our customers our making a considerable investment and the bulls and females need to have the necessary soundness to hold up to difficult environments and produce longevity in the herd. The cattle in this sale represent some of the highest quality Red Angus genetics offered anywhere in the country.

As we stated above the bulls have been developed at the Neo Sho Farms Development Center outside Southwest City, Missouri. The bulls have been fed a high roughage ration that allows the bulls to express their genetic potential and at the same time provide an excellent condition for turnout. The bulls have been running in 10-40 acre fescue pastures during the development period for added exercise and adaptability. The bulls are in excellent shape and will not miss a beat when transitioning to your operation at home.

We are experiencing one of the best times ever in the cattle business. Cattle of all classes are selling well but true "high quality" cattle are setting the bar with record prices for the best in the business. The industry continues to move towards high marbling, high quality cattle. In this offering you will find some of the highest quality cattle to sell anywhere this year.

If we can be of assistance to you in making reservations or travel plans, please feel free to contact us. The sale headquarters will be the Holiday Inn located just off I-44 at Exit 8A or 8B in Joplin, Missouri. We will host a Cattlemen's Seminar, hospitality hour and dinner the night before the sale at the headquarters and we would like to invite everyone to join us. We look forward to seeing you on March 6th and 7th.

Wood Red Angus (MEW)

Mike, Kathryn, Katelyn and Nick Wood.
Wood Red Angus is located near Tahlequah, OK. They have been raising Red Angus since 1985 and upgraded to NSF Red Angus in 1987. They emphasize easy keeping, phenotypically correct cattle with excellent EPDs. Mike has been an invaluable help with the Herdbuilder bull and female sale. He has been a strong supporter of our program and always pitches in when we need an extra hand. Mike is one of the most astute breeders in the country and has one of the strongest minds for pedigrees that we have ever had the opportunity to know. Wood Red Angus is excited about their partnership with LSF and look forward to the years to come. They have bought the best, to offer you the best.

Butcher Red Angus (BRA)

Butcher Red Angus is owned and operated by Ben and Brianna Butcher in Holstein, Iowa. Ben joined our Red Angus family in 2007 by purchasing his first Red Angus females from us during our annual Focus on Females Sale. Ben interned with us during the Spring of 2008 and had the opportunity to participate in all aspects of our operation and was instrumental in our calving operations as well as the development of our bulls. The Butcher's also feed a number of cattle each year and have been competitive buyers of high quality Red Angus feeder cattle in Montana and the upper plains. They see first hand the benefits of how genetics can play a huge role in the profitability of each segment of the beef industry. Ben and Brianna have a very bright future in the livestock industry and we look forward to working with them for many years.

Neo-Sho Farms (NSF)

Kirby, Robyn, Peri and Lexi Lane
Neo-Sho Farms is located in Southwest City, Missouri in the tri-state area of Missouri, Arkansas and Oklahoma. The Lane's are well known throughout Red Angus circles and the beef industry in general for producing some of the very best Red Angus seed stock. For many years Neo-Sho Farms held one of the largest and most successful Red Angus bull sales in the country. In 2004 Neo-Sho Farms had the opportunity to sell the majority of their herd to the Parker Ranch in Arkansas, since that time they have been slowly rebuilding their herd. We have had a long and great relationship with this outstanding seed stock family and we are excited that they are a part of our Herdbuilder production sale. The "2R" cattle have a great reputation in the industry and look for their impressive offering in this sale.

Rhodes Red Angus (RHO)

Rhodes Red Angus is owned and operated by Darryl and Susan Rhodes in Wichita, Kansas. Darryl and Susan have been making quite a name for themselves by acquiring some the best bulls and females over the last few years. We became acquainted with Darryl and Susan when they purchased LSF Night Calver 9921W and LSF Combo Pack 9942W in our Spring 2010 Herdbuilder Sale. These two featured herd sires have not only left an impact on their herd but also the breed. They have had a "keen" eye for selecting cattle that perform at a very high level. The Rhode's are turning into one of the "hot" new operations in the breed and fit in very well with our philosophies and expectations.

Diamante Ranch (DIA)

Diamante Ranch is owned and operated by Glenn and Randy Brown in Diamond, Missouri. The Brown's have been quietly running one of the best Red Angus Seed Stock operations in Missouri for several years. The Diamante herd was built from females acquired from Ludvigson Stock Farms, James Red Angus and Neo-Sho Farms Red Angus. In addition to a strong maternal foundation from these breed leading operations, Glenn and Randy have selected some of the very best herd bulls in the country as well as have instituted a significant AI program to place their herd among the best in the Midwest. The Brown's breeding program is "woven" very closely to our own breeding program and you will see that the bulls line up and fit in very closely as well.

D&D Cattle Company (DDC)

D & D Cattle Company is owned and operated by the Dan Braesch family from Herman, Nebraska. The Braesch's have been customers of ours for many years and built a strong foundation of females through selections from our Focus on Females sales that we held at our home farm in Iowa for many years. They have utilized AI for a very long time and have "stacked" their pedigrees with some of the best sires that the Red Angus breed has to offer. The Braesch's are well known for producing high performance cattle that have the "look." This operation is one of the new "hot" breeders in the country and have a tremendous amount of genetic potential to offer the breed. Look for this operation to produce many Ozark herd bulls for us.

Henderson Red Angus (H2R)

Henderson Red Angus is owned and operated by Frank and Karen Henderson along with their son and daughter in law, Toby and Amy as well as their children, Raynee, Kaycee and Levi in Springtown, Texas. The Henderson's are relatively new Red Angus breeders but have been quietly putting together one of the best herds of Red Angus cows in Texas. Selecting several top females from the historic R.A. Brown Dispersal sale and doubling down with these purchases by utilizing both A.I. and embryo transfer, the Henderson's are fast becoming one of the "hot" young operations in the country. Look for this operation to offer some of the top genetics in the Ozark Sale for years to come.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to ***www.superiorlivestock.com*** and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

SUPERIOR Productions
Broadcast Live on RFD TV
DISH Network 231
DIRECTV 345
800-422-2117

Click-To-Bid. This is Superior's newest way to buy cattle! Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on RURAL TV which is Dish Network channel 232. The sale will also be broadcast live on the internet at www.superiorlivestock.com – just go to the home page and select the auction. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed to view the auction.

Bidders who are successful in making purchases via satellite or internet will be contacted by the ranch after the sale to settle payment and make shipping arrangements.

Can't make the sale?
Watch it LIVE and bid in real-time on

$Profit™ - The Next Generation of Cattle Evaluation

Why $Profit helps:

Today, ranchers have too much data to study. With over 20 traits, buying the best bull has become really confusing. We have actual weights, adjusted weights, ratios, and then a host of EPD's. Every bull is good on some traits and weak on others. The challenge is figuring out how each of those traits is going to impact your bottom line. We wish we truly knew which bull would make the most money from birth to slaughter, but most of the time, we end up guessing.

Back in 2005, Leachman Cattle started working with the BIO group out of Canada. The goal was to come up with one number that sorted the bulls on their bottom line impact. Since 2005, Leachman's have calculated and selected for $Profit. Through test herds, cooperator herds, and feedlot performance data -- $Profit has been proven to work.

The same technology used to calculate $Profit is now being used by Verified Beef to estimate the value of feeder calves. Verified Beef will certify the Relative Market Value of your calves through their Reputation Feeder Calf program. This program uses $Profit to predict the value of the calves in the feedlot and on the rail. This will allow you to earn premiums on genetically superior calves.

How $Profit works:

$Profit assumes that the average commercial bull will have 100 progeny over its lifetime. Let's compare a $10,000 $Profit bull to $6,000 $Profit bull (the average 2008 born Angus bull). The predicted difference between the bulls is $4,000 or about $40 per calf. The model assumes that you keep 30% of your heifers and that you retain ownership on the remainder and sell the finished animals on a grid. We realize that many don't retain ownership, but with the Reputation Feeder Calf program, you can get paid and sell at weaning. Feedlots have already proven their willingness to pay premiums for superior $Profit calves.

What traits are included in $Profit:

$Profit includes nearly every trait that impacts profitability. The effect of most traits on profit is fairly simple to understand. Here is the list of what is included:

Revenue Traits

- Calving ease = more calves
- Weaning & yearling EPD = more weight
- Fertility (days to conception) = more weight & more calves
- Carcass weight = worth more up to 1050 lbs.
- Marbling = valued based on the grid premiums
- Ribeye area = value as impacts yield grade
- % Retail Product = more yield

Cost Traits

- Cow mature size = bigger eats more
- Cow intake = more intake costs more
- Feedlot feed efficiency = cost of gain

Some traits are not so easily characterized as more is better for $Profit. Milk, for example, is a good thing until you get too much. In the $Profit model, each pound of milk EPD over +25 has a more negative effect on fertility than it has a positive effect on weaning weight. There are a few traits not yet included in $Profit: longevity, structure, and disposition. These traits are important but difficult to express in dollars.

Index selection has been proven to work in chickens, pigs, and dairy cows. There is little doubt that it can accelerate the rate of genetic improvement in beef cattle as well. That is why we have decided to provide $Profit to our bull customers.

The technical team at BIO consists of Dr. Steve Miller, Dr. Peter Sullivan, and independent consultant, Brian Pogue. Dr. Miller helped design the $Profit simulation model. Dr. Peter Sullivan calculates all of the underlying EPD's for the Leachman program. Each month, Dr. Sullivan analyzes the database and updates our $Profit predictions. Brian Pogue works to ensure data integrity and model accuracy. This great team excels at generating the $Profit index exclusively for Leachman Cattle of Colorado.

Bio is a company with a mandate for genetic improvement. Their science is leading edge in a number of different areas. BIO has estimated Across Breed Comparison EPD's on commercial and seedstock cattle in Canada since 1988. Economic simulation models have been used to generate indexes since 1996. BIO works in conjunction with the Centre for Genetic Improvement of Livestock (CGIL) at the University of Guelph in the development of new technologies for beef cattle improvement. For further information on BIO or CGIL visit their websites: www.biobeef.com and www.CGIL.uoguelph.ca

Welcome to the Annual Ludvigson Ozark Performance Sale. What a time to be in the beef business! It seems like just about everyone in the cow calf sector is making a profit. You know something though? There is even more money to be made through premiums and enhanced genetics. This sale is loaded from front to back with bulls that are bred to enable you to earn premiums rather than merely profits. WOW! What a way to start the sale. Check out the length, muscle and depth that this son of the $140,000 Redemption displays. He is a STANDOUT! If you sell your calves by the pound this stud can put plenty of extra dollars in your pocket come sale time with his 114 WW ratio and top 5% WW and 1% YW. Notice you get the extra performance plus top 8% CED and 27% BW. This bull covers all the bases.

Would you look at the BIG SPREAD that this big time herd brings to the table? Although he started slow out of the blocks with a low 58# birth weight, he poured it on to earn a 762# weaning weight. That is what I call getting it done. His 50K enhanced EPDs show that he will pass these performance antagonisms on to his offspring with top 8% BW, 18% WW and 3% YW. Imagine the extra profitability that his daughters will have bred into them with his top 9% ST. Just think of the extra profit if every daughter of his stays in the herd just one year longer than the average cow in your herd. My mouth starts to water when I think about the set of feeders that this guy will produce. Check out the top 15% MB, 6% CW and 5% REA. If you want to start earning premiums for your calves you'd better get your hand in the air.

MY, MY! Check out the huge performance spread on this stud. He ranks in the top 8% CED, 8% WW and 3% YW. How much of a luxury would it be to have a bull that you can breed to either heifers or mature cows without fear of excess birth or decreased performance? Can you say Gridmaster? How about a MB EPD that ranks in the top 2% of the breed. Unlike many bulls in other programs he blows apart the carcass antagonisms by also scoring a top 24% REA and 9% CW. This HERD CHANGER can "right the ship" if your cattle are not earning those carcass premiums. Look on Superior Livestock Auction and you will see that there are wind swings in price for the same weight class of cattle. Want to know the reason? Genetics! If you want Clint Berry to start to rep your cattle on Superior you had better be using bulls like this.

Remember standing out in the cold and dark helping that heifer have her calf and thinking "You know, this isn't much fun." I bet it wasn't much fun for the heifer either. Turn this long made herd bull in with your heifers and you should have NO WORRIES during calving season next year. One look at his top 1% ranking for both CED and BW EPDs and you can expect plenty of rest during calving season. This stud is so much more than "just" a heifer bull though. With his 115 WW ratio combined with his top 20% WW and 17% YW he can be a total herd improver. Imagine the daughters out of him and the fertility they can posses with his top 10% HPG and 23% ST. You want to talk about building a set of feeders, the order buyers should be knocking down your door after they see what his calves can do with his top 2% MB and 3% REA.

Herein lies the beauty of genomic enhanced EPDs. With this bull's actual birth weight there is no way we would call him a low birth bull, but with the help of science we see that he is in fact a calving ease bull that ranks in the top 6% for BW as well as the top 16% CED. This bull is going to be a female maker deluxe. Just imagine the set of fertile and easy calving daughters that he can produce and how they can go on to be profit centers for years to come with his top 10% HPG, 26% CEM and 7% ST. The steer mates should be world beaters as well because he sure does get it done on carcass as well with top 12% MB and 30% REA. It's easy to see how he ranks in the top 5% for HerdBuilder and 3% for GridMaster with these outstanding numbers.

One look at this soggy made rascal and it's easy to see how he could make a whale of a set of replacements. When you check out his exceptional ERTs you know that they are going to be loaded with fertility, calving ease and longevity as shown by his top 3% HPG, 9% CEM and 12% ST. It's bulls like this with which we need to rebuild the national herd. If you or your customers sell by the pound he more than has you covered there as well with his top 10% WW and 12% YW. With a pound being worth up to and over $3 you can certainly see how you could pay for this guy in a hurry. What a set of carcass numbers! His top 6% MB, 31% YG, 15% CW and 2% REA EPDs show that he can change your carcass program in a hurry. Whether you are looking to raise replacements or feeder this guy has all the BASES COVERED.

Step right up and help yourself to some big time spread genetics. How about going from a top 16% BW to top 6% WW and 7% YW? It is a huge convenience to have a bull that you can breed to the entire herd rather than painting yourself in a corner when you have to "selectively" breed him. Check out the choice/select spread. It pays to be in that upper 2/3 choice, huh? Take this stud of a bull home and use his top 8% MB to enable you to earn those carcass premiums by hitting the grid targets. We all know that fertility is the most important trait in the cow calf sector. If your heifers are having trouble getting bred this is the bull for you with a HPG EPD that ranks in the elite top 1% of the breed. His daughters will tend to stay in the herd as well with his top 13% ST, and we all know what every extra calf can mean to our bottom line.

Got marbling? If no was your answer you had better load this stud up and use his top 1% MB that is completely off of the charts. This is what I refer to as a "fixer" bull, as in he can fix a problem in your cowherd in one calf crop. He is so much more than just an IMF bull though. How about a REA EPD that ranks in the top 13% of breed along with top 19% CW? That is what I call breaking the carcass antagonisms. Unlike many "carcass" bulls out there this stud excels at the ERTs (economically relevant traits) as well. Imagine the incredible set of replacements he can produce that will be loaded with fertility and longevity with his top 1% HPG and 2% ST. Add to that his top 4% MK and below breed average ME and you know that they will be the KEEPIN' KIND. It's easy to see why he ranks top 1% GridMaster and 2% HerdBuilder.

Check out the big time actual performance spread that this stud brings to the table. How about going from a 99 BW ratio to an impressive weaning ratio of 108? These superb stats are reflected in his EPDs that rank in the top 11% WW while maintaining a BW that is below breed average, and we all know that Red Angus are not heavy birth weight cattle. With a pound on the hoof being what it's worth think about how much extra income that this bull can generate over his lifetime if his calves wean off 20 pounds heavier than the average Red Angus bull. In other words, if you sell by the pound you had better get your hand in the air on this bull. Are you tired of getting discounted for those YG 4s? If so OVERTIME can help you out there as well with his top 6% YG and 14% REA along with a FAT EPD that ranks in the top 6%.

Say hello to your heifer's new best friend. With his top 7% BW EPD I'd say that you had better be careful when you stand behind heifers bred to him because they could sneeze and have a calf. Unlike many other outfit's heifer bulls, our low birth weight bulls offer increased performance such as this guy's top 27% WW to offer you increased profitability. Check out his top 6% MB if you are looking to inject some quality grade into your cowherd. How often do you find a sure fire heifer bull that ranks completely off the charts for the new Red Angus GridMaster index? I can assure you that it is not very often. Notice also how easy calving his daughters should be (something that doesn't always go hand in hand with low BW EPD bulls) with his top 26% CEM. He'll inject fertility into your herd as well with his HPG that ranks in the top 29%.

What a spread! What a spread! Check out the huge actual performance figures on this bull achieving a super low ratio of 82 for birth then absolutely hammering it to knock out a 119 weaning ratio. These outstanding ratios are reflected in his 50K enhanced EPDs with top 29% CED, 2% WW and 12% YW, so if you are looking to produce calves that are born easily and then take off to outrun the competition this is a great place to start. Can you imagine the set of females that this guy could produce? With his top 15% Mk, 14% ME and 17% HPG you can set your price on a set of bred heifers out of this stud that sports a great PROFILE. If you are looking to add a tremendous amount of muscle to your next calf crop, this bull can get it done with his top 1% REA. If you are having trouble with YG 4s and light carcass he has you covered with top 1% YG and 14% CW.

This herd bull is SOGGY! One look at his spring of rib, fleshing ability and deep flank and you just know that he is going to produce a set of females with the "look." In addition to outstanding phenotype his genomic enhanced EPDs show that his daughters will be loaded with fertility and longevity with his top 11% HPG and 29% ST. It's little wonder that his Red Angus HerdBuilder index ranks in better than the top 1/3 of the breed. As excited, as you should be over his daughters I'd wager that you would be absolutely giddy about his steers. With a MB EPD that ranks in the top 16% of the breed he can take you a long ways towards hitting those high quality grid targets. The sire was our high selling bull in 2009 and this son is living proof that quality genetics are always a sound investment and that we believe in our product so we use them back in our herd.

Here comes a herd bull that definitely is the front pasture kind. He will be an easy find in the pens and don't be surprised if your neighbors come knocking on your door to ask where you got him. This guy has performance to burn posting impressive ratios of 102 for weaning and a 113 for yearling. If you are looking for a bull whose offspring will certainly press the scales down this is the bull for you and with every extra pound often being worth over $3 this bull can more than pay for himself in a hurry. If your cattle are lacking in the carcass quality department this stud and his top 7% MB EPD can catch your herd up in one calf crop. He can also increase your profit potential if your cattle suffer from light carcasses with his top 14% CW. With his combination of superior phenotype and great performance and carcass quality he has to be on your short list.

MY, OH MY! Check out the incredible top 2% MB EPD that this HEAVY DUTY stud brings to the table. If your cowherd needs a huge dose of carcass quality this bull is certainly one that can get it done. Remember we believe it is our responsibility to offer you bulls that earn you premiums instead of just a profit. With the addition of his top 3% CW ranking it's pretty easy to see how he ranks in the top 2% for the new Red Angus GridMaster index. Check out the incredible individual performance that this guy obtained. Even though he started out of the block slow with a low 94 BW ratio he absolutely hammered it to obtain a 109 WW ratio. He didn't stop there though; he kept it floored to achieve a stupendous 114 YW ratio. It's little surprise that he has such outstanding performance with his dam earning a superb 105.3 MPPA on her first three calves.

How often do you find a bull with a low 69# actual birth weight and 95 ratio to have growth EPDs that rank in the top 27% for WW and the top 20% for YW? If you are looking for a bull to sire calves that are moderate at birth and then press the scales down at sale time this is one for you. Whatever your needs are for carcass IMPROVEMENT this guy can help you out with his top 15% MB, 24% YG, 21% CW, 15% REA and 11% FAT. WOW! That is what I call getting it done on balanced carcass improvement. We all know that fertility is the most important trait in the cattle business and this guy has it in spades with a HPG that ranks completely off of the charts and of course is in the top 1% of the breed. He has the phenotype as well as he is deep, soggy and oh so good.

Check out the outstanding spread on this herd bull prospect. He goes from an ultra low 86 BW ratio to ratios of 103 for weaning and 104 for yearling. His daughters should be loaded to the hilt with fertility as well with his top 3% HPG. His GridMaster index also shows that he can really increase your profitability if you sell on a grid. The Andrew line is one of the most consistent sire lines that we've had on the ranch.

If you are looking to put pounds on the ground this stud is the one for you. Check out his ratios of 108 for weaning and 111 for yearling. This is shown in his top 31% WW and 16% YW EPDs. If your carcass program is in need of an overhaul this bull can get it done for you with his top 4% MB, 12% CW and 25% REA. It's pretty easy to see how his HerdBuilder index ranks in the top 16%. Notice the dam sports a 103.2 MPPA.

87	52	4	-2.4	49	74	30	4	8	3	9	0.85	0.02	11	0.31	0.03

This bull shatters the carcass antagonisms with a superb MB EPD that ranks in the top 4% of the breed combined with a REA that ranks in the top 15%. With these kinds of numbers it easy to see how his GridMaster index ranks in the top 15% of the breed. He ought to put out a heck of replacements with his top 2% MK stacked on top or a dam that has obtained ratios of 107 WW with only a 97 BW on 6 progeny.

One look at this bull and it is easy to see why the Epics have been so popular across the country. Can you imagine the daughters out of this guy? Especially when you consider that he has EPDs that rank in the top 1% for HPG and 2% ST. Throw in his top 3% ME and you really have one to build a herd around. His sons will press the scales down as well with EPDs that rank in the top 10% WW and 11% for YW.

Although this guy started out of the blocks slow with a 94 BW ratio he poured it on to obtain a 101 WW ratio. He wasn't done there though as he went on to obtain a 107 YW ratio. This is reflected in his EPDs that rank in the top 29% CED, 35% BW, 18% WW and 21% YW. Think of how much fertility and longevity will be bred into his daughters with his top 7% HPG and 29% ST. His top 21% GridMaster shows his steers will also be pretty good.

With the chase on for high quality grade cattle have your calves started to lose some muscle? If so take this stud home and use his REA EPD that ranks in the top 28% of the breed to inject some more loin into your calves. If you need some extra punch in your calves he can help there as well with his top 7% WW and 17% YW.

One look at this herd bull and it's easy to see why the Epics have been so popular across the country. Check out the fertility and longevity that this bull can inject into his daughters with his top 1% HPG and 8% ST. If you could force yourself to let go of them one could only imagine the money you could get for a set of bred replacements out of him. He hits a home run on carcass as well with his top 10% Mb, 75 YG and 2% REA.

Here comes a bull with "the look." I'd wager to say that your neighbors will be knocking on your door to ask where you got him. This handsome devil also excels at carcass with his top 26% MB, 31% YG and 9% REA along with better than breed average CW. Throw in his 110 weaning ratio and you have a bull that can really turn a profit. I'd expect your calving season to be restful when you use his top 24% BW.

Super actual performance figures on this square made herd bull prospect. He sports an incredible 113 WW ratio even though he started out with a low 99 BW ratio. This is reflected in his EPDs that start out below breed average for CED and BW then accelerate to top 12% WW and 13% YW. You really have to like that even with all this performance he still ranks in the top 14% of the breed for ST. Notice his dam sports a 105.2 MPPA.

NSF MISS PACKER B049's dam holds a 101.2 MPPA and B049 reports a 103 weaning weight ratio. She ranks in the top 3% for weaning weight, the top 7% for yearling weight, the top 41% for heifer pregnancy, the top 39% for calving ease maternal, the top 1/3 for marbling, the top 6% for carcass weight and the top 28% for ribeye.

Reaping the Rewards...

of Red Angus Influenced Replacement Females

The maternal side of any cow/calf operation collectively has a genetic impact equivalent to that operation's herd bulls.

Additionally, their potential to affect producers' bottom lines through reduced maintenance costs are far greater. However, many cow/calf operations lack a vehicle to reap full value for the superior maternal genetics represented in their Red Angus influenced replacement females. Pro-Cow was designed to meet that need by expanding marketing opportunities for the female half of the calf crop.

Trouble Free Replacements are just a click away!

ProCow Entry Qualifications:

- **Females must be a minimum 3/8th Red Angus**
- **Designed for commercial replacement females**
- **Females must be sired by a Registered bull**
- **Bred and open heifers, bred cows and pairs**

Need Replacements?

Visit ProCow on the web:

- Go to the Red Angus Website at www.redangus.org and click on the ProCow logo.
- Follow the prompt to "View Current Listings".
- Females are listed by State (alphabetically).
- Contact information is provided in each Procow listing.

Have Females for Sale?

ProCow Listings are Simple & Free:

- Go to the Red Angus Website at www.redangus.org and click on the ProCow logo.
- Follow the prompt to "Submit Listings".
- Females must be completely and accurately described on ProCow Entry form by seller, which is then submitted to RAAA staff.
- Staff reviews entry form and posts Replacement Females on RAAA Website (Free of Charge).
- Website listing can be used whether females are offered by private treaty, video auctions or sale barns.

Pro-Cow

Replacement females with all the right Tools!

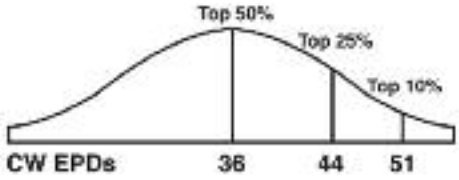
A more holistic approach to carcass value...

Carcass Weight and Yield Grade

Advancing the mission of genetically describing Red Angus cattle for traits that have a direct impact on profitability, Red Angus has added Carcass Weight (CW) and Yield Grade (YG) EPDs to its arsenal of Economically Relevant Traits (ERTs). The deflated choice:select spread and reduced cattle numbers have combined to refocus the industry's selection pressure away from simply increasing Marbling Scores and looking instead to place greater selection pressure on Carcass Weight and Yield Grade. Red Angus Stakeholders are now equipped with the tools to make genetic progress in these two profit determining traits.

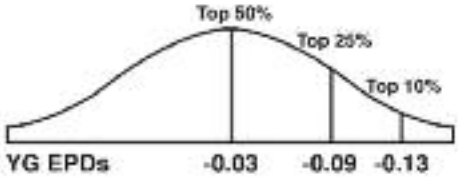
Carcass Weight (CW) Predicts differences in hot carcass weight and is expressed in pounds.

Determining the level of selection pressure placed on CW should be a very well thought out decision, as grid pricing assigns significant discounts on carcasses that are too light (less than 550 pounds) or too heavy (over 1,000 pounds). Therefore, producers should avoid reckless maximization/ minimization of CW EPD. A more appropriate use of the CW EPD starts with knowing the previous carcass performance of a producer's calf crop. Based on that initial information, producers can better determine the level of selection pressure for CW EPD in an effort to achieve their ideal carcass weight.



Yield Grade (YG) Predicts differences of carcass yield grade score and is expressed in USDA Yield Grade score (1- 5).

Just as the USDA Yield Grade is calculated using the individual animal's carcass weight, ribeye area (REA), and backfat (FAT) data, RAAA's YG EPD is calculated using the genetic predictions of CW, REA and FAT EPDs. The reliability of Red Angus' YG EPD is enhanced by using both ultrasound and actual carcass data in the calculation of REA and FAT EPDs.
Prior to the publication of YG EPD, producers who desired a change in the yield grade genetics of their cattle were hamstrung, as they were forced to utilize two indicator traits (REA and FAT) of yield grade. Through providing a YG EPD, producers are now armed with a reliable, easy to implement tool which will better enable successful selection decision.



• Terms & Conditions •

The Red Angus Association Terms and Conditions will apply if the terms and conditions printed here are not applicable.

TERMS: Terms of the sale are check or cash. Every animal will be sold to the highest bidder. The right of property shall not pass until after complete settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the sale facility or ranch.

BIDDING DISPUTES: The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.

RETAINED INTEREST: We are retaining a 1/2 interest in all bulls in the catalog. We are selling the remaining interest, full possession, and full salvage value on these bulls. We also retain a breeding interest for in-herd use only in all other bulls in the catalog. We reserve the right to collect semen at the convenience of the buyer.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk until March 10, 2015. After that, there will a per day feed cost added to the purchase price, payable before possession occurs.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: All animals sold are guaranteed breeders by the sellers. Any animal that has not proven itself as a breeder within six months after date of sale, if in healthy condition, may be returned to seller at buyer's expense. The seller reserves the privilege of trying, for a period of six months, to prove the animal is a breeder. The seller, at his option, may either replace the animal with another of equal value or grant the buyer a credit for use on any cattle marketed by the seller in full settlement and transaction of ALL claims. Yearling bulls shall be guaranteed breeders for no more than 25 females. All complaints regarding breeding difficulties must be reported in writing by the buyer to the seller within the specified time above, and any animal returned must be free from disease and in good health and condition. All animals are guaranteed to be breeders, with the exception of: a) calves under twelve months of age; or b) animals shown by Purchaser after sale (in case of animals shown after purchase the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer; or c) gross negligence or willful misconduct on the part of the Purchaser.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six month of the sale date or no later than six months after the animal reaches 18 months of age with the exception of claims involving defects or parentage.
2. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the ranch of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

FERTILITY: All bulls have been evaluated and are guaranteed to be breeders.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal, or otherwise, for damages of any kind. Any person attending the sale does so at his own risk.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IDENTIFICATION: Each animal carries a readable tattoo. The tag numbers on the cattle correspond with lot and tattoo numbers in this catalog.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be provided on all bulls sold. Heifers selling for $900 or above will receive a registry certificate. If buyers of heifers under $900 desire a registration certificate, they can be purchased for $100 added to the selling price.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, wither expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set fort in terms and conditions are in lieu of all other warranties, either expressed or implied and the remedies proved therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

HEALTH: All cattle will have official health certificates and are guaranteed for interstate delivery.
